## PROFESSIONAL SUMMARY

Tech-savvy and analytical MCA student seeking a challenging position in a reputable organization to apply and expand my technical abilities in software development, web applications, AI/ML integration, and database design. Passionate about AI-driven solutions and frontend development, with strong problem-solving, adaptability, and teamwork skills. Demonstrated hands-on experience in building functional web applications through full-stack development and machine learning projects.

## EDUCATION

**Master of Computer Applications (MCA)** | CGPA: 7.75/10

*Mar Athanasius College of Engineering, APJ Abdul Kalam Technology University* | Aug 2024 – May 2026

**Bachelor of Computer Applications (BCA)** | CGPA: 6.36/10

*MES College, Mahatma Gandhi University* | Aug 2021 – Mar 2024

## TECHNICAL SKILLS

| | |
|---|---|
| **Programming Languages** | Python, JavaScript, SQL |
| **Web Technologies** | React.js, Node.js, Flask, HTML5, CSS3, JavaScript (ES6+), RESTful APIs |
| **Databases** | MySQL |
| **Developer Tools** | Git, GitHub, VS Code |

## KEY PROJECTS

**Hybrid Object Detection & Classification - Deep Learning Application** (*Python, Flask, YOLOv8, EfficientNet-B0, OpenCV, HTML/CSS/JavaScript)*

• Developed an AI-powered web application capable of detecting and classifying objects from images, videos, and live webcam feeds with real-time processing capabilities

• Integrated YOLOv8 for object detection and EfficientNet-B0 for classification, implementing Flask backend to handle model inference and data processing

• Implemented responsive frontend using HTML, CSS, and JavaScript for seamless user experience across different input sources

**Credit Card Default Prediction System – Machine Learning Application** (*Python, Random Forest, React.js, Node.js, MongoDB)*

• Built an end-to-end machine learning web application to predict credit card payment defaults using classification algorithms

• Performed comprehensive data preprocessing including feature engineering, handling missing values, and model training using Random Forest algorithm with comparative analysis of multiple ML approaches

• Developed a responsive React-based frontend integrated with Node.js backend API for user input collection and result visualization

## CERTIFICATIONS & ACHIEVEMENTS

• Participated in **Code Crusade – Innovex 2025**, a competitive coding event organized by the Department of Computer Science – Data Science, Nirmala College Muvattupuzha (February 2025)

• Completed an intensive five-day **Cloud Computing workshop**, gaining hands-on exposure to **AWS, VM management, security, CI/CD pipelines, and containerization**, organized by IIIT Kottayam in association with Educ Kshetra (August 2025).

## SOFT SKILLS

Problem Solving, Self-Management, Flexibility

## ADDITIONAL INFORMATION

**Languages:** English, Malayalam
